Dear Dr. Ottaviani,

RE: EJOS-D-08-00001R1 entitled "Wearing Analysis for the Schanz Screws Layout in the Cortical Section of the Tibia with Monolateral External Fixator"

You wrote a beautiful article which was accepted by the Reviewer Committee. I come to ask to you whether you are interested to belong to this committee. We would be very honoured by your participation.

If so, thank you to send the following information to the address e-mail below:

- the address e-mail to which we will be able to join to you with certainty
- your poles of interest

We will solicit you per annum approximately six times for an analysis of articles online in connection with your poles of interest. The software which manages the site will indicate you the deadlines for replies and will ask to you whether you or not agree to make the an alysis. A possible fastest answer is wished to this first question, so that in the event of refusal (that you will be able to justify but without that being obligatory), we can seek another reviewer.

I thank you in advance for your answer to this request.

Addresses for answers:

kehrpier@aol.com

Sincerely,

Pierre Kehr
