Foreword

This volume contains the papers selected for presentation at the 20th Workshop on Privacy in the Electronic Society (WPES 2021), held in conjunction with the ACM CCS conference. This year, WPES was held as an online event, due to the COVID-19 pandemic, on November 15, 2021.

In response to the call for papers, 58 submissions were received, and all submissions were evaluated on the basis of their significance, novelty, and technical quality. The Program Committee, comprising 46 members, performed an excellent task and with the help of additional reviewers all submissions went through a careful anonymous review process (three or more reviews for each submission). The Program Committee's work was carried out electronically, yielding intensive discussions. Of the submitted papers, 12 full papers and 8 short papers were selected for presentation at the workshop.

The success of an event like WPES 2021 depends on the volunteering effort of many individuals, and there is a long list of people who deserve acknowledgment. We would like to thank all the members of the Program Committee and all the external reviewers, for all their hard work in evaluating all submitted papers and for actively participating in the discussion and selection process. We would like to express our gratitude to the WPES Steering Committee, and its Chair Pierangela Samarati in particular, for their guidance and support in the organization of the workshop. Thanks to Jinsung Jeon, for taking care of publicity, and to Lisa Tolles (from Sheridan Communications) for collating the workshop proceedings. We are grateful to Michael Franz and Dokyung Song (ACM CCS 2021 Workshop Chairs) and to Yongdae Kim and Jong Kim (ACM CCS 2021 General Chairs) for their support in workshop organization.

Last but certainly not least, thanks to all the authors who submitted papers and all the workshop's attendees. We hope you find the program of WPES 2021 interesting, stimulating, and inspiring for your future research.
