Following the description of the analysis and results, the measured values of the parameters x_{CP} , y_{CP} , Δx , and Δy were interpreted in terms of an alternative set of parameters: x , y , $|q/p|$, and ϕ . Following publication, a typographical error in the sign of the phase ϕ was found. The correct value is $\phi = -0.056^{+0.047}_{-0.051}$. This does not affect any conclusions reported in the Letter.
