

Acknowledgment of reviewers

A scientific society should try to ensure that the information appearing in the pages of its journal is accurate. Expert reviewing is the chief method by which the scientific community sets and maintains its standards of excellence. The Publications Committee of the American Society of Animal Science gratefully acknowledges the assistance given by the following reviewers who agreed to review articles submitted to the *Journal of Animal Science* between September 1, 2007, and September 30, 2008. We sincerely apologize if any names have been inadvertently omitted from this list; please let us know of any omissions, and the missing names will be added to next year's list.
