The Animal Welfare Indicators (AWIN) project promoted the development of protocols centred on animal-based indicators to assess welfare in goats, sheep, donkeys, horses and turkeys

To foster an effective dissemination of AWIN outcomes to general public and stakeholders (e.g. veterinarians and farmers)

simple and practical approach

0

apps were developed for Android devices and made freely downloadable from Google Play Store

To improve

- the efficiency of on-farm data collection the management of welfare issues in farm animals

apps, based on AWIN welfare assessment protocols, allow and simplify data collection on farm
