

Supplementary material

Table S1: Compositions and chemical traits (expressed as % of DM) of the TMR for dry-cows and lactating cows of the 4 herds

Component	Herd							
	A		B		C		D	
	Dry-cows	Lactating cows						
Ingredient, % of DM								
Grass hay	-	-	63.8	7.8	56.9	7.7	15.2	15.6
Alfalfa hay silage	-	-	-	4.6	-	4.7	-	-
Corn silage	23.7	34.5	28.2	30.9	-	23.7	-	30.5
Grass silage	-	-	-	-	-	5.0	39.3	4.6
Wheat straw	40.5	7.1	-	-	20.3	1.9	22.8	-
Ground shelled corn	11.2	17.6	-	26.1	-	28.3	-	-
Soybean meal	4.6	7.5	8.0	9.0	-	-	-	-
Corn grain	-	-	-	-	-	8.5	-	-
Soybean seed	-	-	-	5.7	-	-	-	-
Commercial concentrate	13.5	21.8	-	-	22.8	20.2	22.7	49.3
Flax pannell	-	-	-	3.8	-	-	-	-
Hydrogenated fat	-	-	-	1.3	-	-	-	-
Molasses	2.5	4.1	-	3.3	-	-	-	-
Corn meal	4.0	7.4	-	7.5	-	-	-	-
Chemical, % of DM								
CP	10.9	15.7	14.3	16.0	12.8	15.8	11.5	17.4
Lipid	3.1	3.9	2.8	5.6	2.5	3.3	2.2	3.1
NDF	49.7	32.3	52.8	28.0	58.2	34.0	56.4	34.6
NDFF	44.7	24.0	51.5	21.2	55.1	24.4	53.3	26.4
ADF	32.8	18.7	28.0	15.1	34.1	18.9	37.1	17.6
Starch+sugar	21.2	35.4	10.9	37.8	7.9	31.1	8.1	31.2
NEI (Mcal/kg DM)	1.39	1.65	1.29	1.62	1.17	1.66	1.22	1.68

Note: NDF = Neutral detergent fiber; NDFF = NDF from forage; ADF = Acid detergent fiber; NEI = Net energy lactation

Table S2: Descriptive statistics of hematological reference intervals (RIs) for cows at 3 ± 1 DIM. Number of observations, mean, standard deviation, median, minimum, maximum, RI, number of outliers, confidence intervals (CI) of the lower (LRL) and upper reference limits (URL) and distribution of data. All RIs were generated according to a nonparametric method.

Number of observations, mean, standard deviation, median, minimum, maximum, RI, number of outliers, confidence intervals (CI) of the lower (LRL) and upper reference limits (URL) and distribution of data. All RIs were generated according to a nonparametric method.

Analyte	Units	n	Mean	SD	Median	Min	Max	RI	Outliers	LRL 90% CI	URL 90% CI	Distribution
β -carotene	$\mu\text{mol/L}$	131	24.22	11.18	22.36	1.86	61.48	9.32-50.30	2S	1.86-11.18	42.85-61.48	NG
