The values reported in the manuscript for β_a , β_b , β_c represent $K_{T0}(a)^{-1}$, $K_{T0}(b)^{-1}$ and $K_{T0}(c)^{-1}$ respectively. The values of axial compressibility coefficients, defined as $(3K_{0j})^{-1} = l_{0j}^{-1} (\partial l_j / \partial P)$, are 0.0048(6), 0.011(1) and 0.0088(3) GPa^{-1} for the a , b and c -axis respectively.
