PRE AGORA 2020.11.13[Fri]—14[Sat] / SCIENCE AGORA 2020.11.15[Sun]—22[Sun]

(Event Title)	Considering LIFE after COVID-19: How Multi Agent System can solve the conflict on self-priority and others
(Summary of Event)	<p>Since COVID -19 had spread all over the world, our value and priority in daily life has compelled to change greatly. Whereas COVID is a threat, which human beings must confront, non-relevant to boundary of nation and individual, it also enhances axis between the infected and non-infected, the younger and the elder, or economic/ health- oriented.</p> <p>On the other hand, MAS (Multi- Agent System) has been aimed to focus on harmony, which balances between self- profit and profit as whole, as shown in simulation system. This system is also related to "social dilemma" from game-theory, as for social effectiveness and optimization.</p> <p>This scientific event tries to find the meeting point of self and whole society by the collaboration of world citizens and platform of industry and information science.</p>

Date of meeting	【online】 21 st , November 2020: 15:30- 17:30 (Japan Time)

Speakers' profile

<Prof. K. Serena Grego>

-University of Milano, Department of International, Legal, Historical and Political Studies (Language, Humanity and ICT)

<Prof. Rafik Hadfi>

-Nagoya Institute of Technology, The lead on CREST (D-Agree) Project (Informatics and Multi Agent System)

<Jawad Haqbeen (PhD student)>

-Nagoya Institute of Technology, Researcher on CREST (D-Agree) Project (Informatics and Internet-of-People)

<Prof. K.Amino>

-ShanghaiTech University, Institute of Humanities (Sociolinguistic and Discourse Analysis)

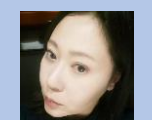

K. Grego
(U of Milano)

R. Hadfi (NIT)

J. Haqbeen (NIT)

K. Amino,
(ShanghaiTech U.)

Content of the event

(1)Introduction : Kaoru Amino (ShanghaiTech University)

Workshop:

Topic 1: Self-profit and others'-profit under covid-19: Justice by number and intersubjectivity.

Topic 2: How to define boundary of topic/ context space? Reference and Re-framing in argumentation.

(2) Presenter 1: K.Serena.Grego (University of Milano)

"The impact of Covid-19 from the view of Social Science"

(3) Presenter 2: Prof. Rafik Hadfi (Nagoya Institute of Technology)

"Informatics and Multi-Agent System (MAS) under covid-19 ; The theory and application"

(4) Jawad Haqbeen (PhD student) (Nagoya Institute of Technology)

"Agent that facilitate discussion among people: A large scale discussion in Afghanistan."

(5) Round up
