*Special Issue: Proceedings of the Symposium on the Jahn-Teller Effect, ICTP – Trieste, Italy, 26–30 August 2006 Edited by: Isaac Bersuker, Nicola Manini, Erio Tosatti and Eugenio E. Vogel*

### Preface

I.B. Bersuker, N. Manini, E. Tosatti and E.E. Vogel . . . . .	1
<b>I. General theory</b>	
The $\Gamma_9 \times (g + 2h)$ Jahn-Teller Hamiltonian A. Ceulemans, E. Lijnen (Leuven, Belgium) and Q.-C. Qiu (Shantou, PR China) . . . . .	3
Analytical solutions for the $E \otimes e$ dynamic Jahn-Teller problem in the strong coupling limit T. Sato (Leuven, Belgium, Kyoto, Japan), L.F. Chibotaru and A. Ceulemans (Leuven, Belgium) . . . . .	8
The band Jahn-Teller effect: A new perspective on an old problem V. Polinger (Bellevue, USA) . . . . .	13
Unexpected phase-jumps upon cycling around a conical intersection R. Englman (Yavne, Israel), A. Yahalom (Ariel, Israel) and T. Vértési (Debrecen, Hungary) . . . . .	20
Vibronic reduction factors in $E \otimes (\beta_1 + \beta_2)$ and their Berry's phase manifestations R. Englman (Yavne, Israel) and A. Yahalom (Ariel, Israel) . . . . .	24
Environment-effect on the Berry phase of a driven $G_{3/2} \otimes \epsilon(t)$ system in a magnetic field by the square-root method A. Yahalom (Ariel, Israel) and R. Englman (Yavne, Israel) . . . . .	27
Quantum chaos, localized states and clustering in excited spectra of Jahn-Teller models E. Majerníková (Bratislava, Slovak Republic, Olomouc, Czech Republic) and S. Shpyrko (Bratislava, Slovak Republic) . . . . .	32
Spin and orbital degeneracy problems in the DFT method. Relation to the Jahn-Teller effect I.G. Kaplan (Postal, Mexico) . . . . .	39
The Jahn-Teller effect as a general tool for solving molecular and solid state problems: Novel findings I.B. Bersuker (Austin, USA) . . . . .	44
<b>II. Molecular systems</b>	
Spin-vibronic superexchange and dynamical vibronic order in ammoniated cubic fullerides L.F. Chibotaru (Leuven, Belgium) . . . . .	53
Pseudorotation in fullerene anions J.L. Dunn, I.D. Hands and C.A. Bates (Nottingham, UK) . . . . .	60
The Jahn-Teller effect in $(h_u^+)^2 \otimes h_g$ systems I.D. Hands, W.A. Diery, J.L. Dunn and C.A. Bates (Nottingham, UK) . . . . .	66
Fulleride ions in various crystal fields studied by infrared spectroscopy G. Klupp and K. Kamarás (Budapest, Hungary) . . . . .	74
A study of the quadratic $p^2 \otimes h$ Jahn-Teller system L.M. Sindi, I.D. Hands, J.L. Dunn and C.A. Bates (Nottingham, UK) . . . . .	78
Metal dimer and trimer within spherical carbon cage T. Kato (Sakado, Japan) . . . . .	84
Strong vibronic interactions and possible electron pairing in the photoinduced excited electronic states in nanosized molecules T. Kato and T. Yamabe (Nagasaki, Japan) . . . . .	89
Jahn-Teller and related conical intersections in the benzene radical cation and the monofluoro derivate I. Bâldea, J. Franz and H. Köppel (Heidelberg, Germany) . . . . .	94
On the Jahn-Teller and pseudo-Jahn-Teller effects in the photoelectron spectrum of cyclopropane T.S. Venkatesan, S. Mahapatra (Hyderabad, India), H. Köppel and L.S. Cederbaum (Heidelberg, Germany) . . . . .	100
Vibronic origin of the $H_3O^+$ metastability I. Ogurtsov, N. Gorinchoy and I. Balan (Chisinau, Republic of Moldova) . . . . .	107
Jahn-Teller effect in the magnesium phthalocyanine anion J. Tóbiš and E. Tosatti (Trieste, Italy) . . . . .	112
Calculation of vibronic coupling constant and vibronic coupling density analysis K. Tokunaga, T. Sato (Kyoto, Japan) and K. Tanaka (Kyoto, Japan, Japan) . . . . .	116
<b>III. Impurity centers, clusters, and complexes</b>	
Antisymmetric exchange and pseudo Jahn-Teller instability in spin-frustrated metal clusters B.S. Tsukerblat, A. Tarantul (Beer-Sheva, Israel) and A. Müller (Bielefeld, Germany) . . . . .	124

Jahn–Teller coupling in spinel-type crystals doped with transition metal ions S.I. Klokishner, O.S. Reu, S.M. Ostrovsky, A.V. Palii, L.L. Kulyuk (Kishinev, Moldavia), B.S. Tsukerblat (Beer-Sheva, Israel) and E. Towe (Pittsburgh, USA) . . . . .	133
Effects of vibronic interaction in cyano-bridged clusters containing Mn(III) and Mn(II) ions S.M. Ostrovsky, S.I. Klokishner, A.V. Palii (Kishinev, Republic of Moldova) and K.R. Dunbar (Texas, USA) . . . . .	138
Magnetic relaxation in cyanide based single molecule magnets S.I. Klokishner, S.M. Ostrovsky, A.V. Palii (Chisinau, Republic of Moldova) and K. Dunbar (Texas, USA) . . . . .	144
The Jahn–Teller effect in octahedral T Ground states – an experimental and DFT study on $M^{III}X_6$ polyhedra ( $M^{III}$ : Ti, V, Co; X: Cl, F) in various solids D. Reinen (Marburg, Germany), M. Atanasov (Marburg, Germany, Sofia, Bulgaria) and P. Köhler (Marburg, Germany) . . . . .	151
On the ground state $T_g \otimes e_g$ ( $T_g = {}^2T_{2g}, {}^3T_{1g}$ ) Jahn–Teller-coupling in hexacyano complexes of 3d-transition metals M. Atanasov (Sofia, Bulgaria, Heidelberg, Germany) and P. Comba (Heidelberg, Germany) . . . . .	157
Vibronic transitions in the vicinity of the dynamical instability of the final state V. Boltrushko, S. Holmar, I. Tehver and V. Hizhnyakov (Estonia) . . . . .	164
Theoretical studies of nonradiative 4f–4f multiphonon transitions in dielectric crystals containing rare earth ions B.Z. Malkin (Kazan, Russian Federation), K.K. Pukhov (Moscow, Russian Federation), S.K. Saikin (Kazan, Russian Federation, La Jolla, USA), E.I. Baibekov and A.R. Zakirov (Kazan, Russian Federation) . . . . .	170
Modeling of electron-vibrational $4f^n-4f^{n-1}5d$ spectra in $LiYF_4:RE^{3+}$ crystals O.V. Solovyyev and B.Z. Malkin (Kazan, Russian Federation) . . . . .	176
Jahn–Teller effect on the $[TiF_4F_4F_{int}]^{6-}(C_{4v})$ and $[NiF_4F_4F_{int}]^{7-}(C_{4v})$ clusters embedded into $SrF_2$ crystals V.A. Ulanov, E.R. Zhiteitceva and A.G. Varlamov (Kazan, Russian Federation) . . . . .	182
Jahn–Teller d-state term splittings in Ti, Zr, and Hf elemental oxides: Intrinsic bonding/anti-bonding states and conduction/valence band edge intrinsic defects G. Lucovsky (Raleigh, USA) . . . . .	187
First-principles calculations of parameters of electron-vibrational interaction and estimations of Jahn–Teller stabilization energy for $Cr^{3+}$ ion in elpasolites M.G. Brik (Kyoto, Japan) and N.M. Avram (Timisoara, Romania) . . . . .	193
Comparative study of the Jahn–Teller effect in the ${}^4T_{2g}$ excited electron state of $Cr^{3+}$ ion in elpasolite crystals N.M. Avram (Timisoara, Romania) and M.G. Brik (Kyoto, Japan) . . . . .	198
IV. Cooperative phenomena in crystals	
Polarons and solitons in Jahn–Teller systems	
D.P. Clougherty (Burlington, USA) . . . . .	203
The $E \otimes e$ and $T \otimes t$ Jahn–Teller polarons Y. Takada and M. Masaki (Chiba, Japan) . . . . .	207
Current flow around small polarons embedded in a Mott insulator H. Koizumi (Ibaraki, Japan) . . . . .	211
Dilution effects on orbital order in strongly correlated electron systems S. Ishihara, T. Tanaka (Sendai, Japan) and M. Matsumoto (Zürich, Switzerland) . . . . .	216
The ground state phases of orbitally degenerate spinel oxides G. Jackeli (Lausanne, Switzerland, Tbilisi, Georgia) . . . . .	220
Orbital ordering induced ferromagnetism in $Lu_2V_2O_7$ S. Miyahara, A. Murakami and N. Furukawa (Sagamihara, Japan) . . . . .	223
Phonons and Jahn–Teller distortion in manganites M. Talati and P.K. Jha (Vadodara, India) . . . . .	227
A cooperative pseudo Jahn–Teller effect in three phases of $CeAlO_3$ W.J.A. Maaskant (Leiden, The Netherlands) . . . . .	232
Strain in Jahn–Teller systems as a precursor to co-operative interactions E.A. Moujaes, J.L. Dunn and C.A. Bates (Nottingham, UK) . . . . .	238
Author Index . . . . .	I
Subject Index . . . . .	II
