

**Supplementary Table 1C:** This table lists all genes significantly modulated by the perifosine/sorafenib combination in the HDLM-2 cell line. These genes are those identified by the lower right circles (red or green) of the Venn diagrams shown in Figure 4.13. The gene symbols highlighted in orange identify the subset of genes modulated only by perifosine/sorafenib combination, i.e. the genes indicated in bold underlined in the Venn diagrams of Figure 4.13. The genes are listed according to the hierarchical clustering of data shown in the heat map on the left hand side of the Table. Clustering was carried out as described in Materials and Methods.
