Manuscript Received: 8 November 2013; Manuscript Accepted: 8 November 2013

Due to an error in processing the open-reading frame for spermine synthase, the mutation c.200G>A was incorrectly reported as a nonsense mutation, p.G67X. Rather the correct nomenclature should be p.G67E, a missense mutation. Therefore, the title of the paper should be altered to read: “Snyder-Robinson syndrome: A novel missense mutation in spermine synthase and expansion of the phenotype”.

The authors respectfully regret the error.
